EXECUTIVE SUMMARY

An analytical engineer with a background in systems and web development. I specialize in making databases faster and creating automated tools for business. I use data and predictive analytics to help solve technical challenges and improve how systems work.

EXPERIENCES

Schools Division Office of Manila | Full-Stack Developer Intern (2026)

Architected a centralized Human Resource Development (HRD) management portal using full-stack frameworks to digitize administrative workflows, improving data accessibility and system efficiency within the School Governance and Operations Division. Collaborated within an Agile team to plan feature roadmaps and conduct system testing, utilizing responsive design principles to ensure cross-platform compatibility across desktop and mobile devices.

Fukushimart Convenience Store | Full-Stack Developer Academic Project (2025)

Developed a responsive e-commerce application using React.js and Node.js, architecting a scalable product management system with dynamic categories and integrated RESTful APIs for efficient data exchange. Implemented Git/GitHub for version control and collaborated with stakeholders to translate complex administrative requirements into scalable web-based solutions.

GTA: Multiplayer | Game Developer (2020 – 2022)

Engineered custom gameplay systems using Pawn scripting and the SA-MP API, increasing user engagement by auditing legacy scripts and refactoring code to significantly reduce server crashes. Optimized server performance and security by writing efficient SQL queries in MySQL to manage player accounts, facilitating full-lifecycle version updates from planning to multiplayer stress testing.

KEY SKILLS

- **Programming & Web Development:** JavaScript (React.js, Node.js), Python, PHP, Java, C++, HTML5, CSS3, SQL (MySQL), and RESTful APIs.
- **Automation:** Workflow orchestration with n8n, data analysis/automation in Microsoft Excel, and documentation via Microsoft Word.
- **Creative Design:** Proficient in Canva for digital marketing collateral, social media content, and UI/UX assets.
- **Technical Methodology:** Agile development, system testing, and version control using Git/GitHub.

EDUCATION

Bachelor of Science in Information Technology with Specialization in Data Science Universidad de Manila	2022-2026 Cum Laude
Bachelor of Science in Computer Science Pamantasan ng Lungsod ng Maynila	2020-2022
Information and Communication Technology Philippine Christian University	2018-2020 With Honors
